

The Journal of Grey System

Contents

A Two-stage Reliability Allocation Method under Uncertainty Yingsai Cao, Sifeng Liu, Zhigeng Fang, Wenjie Dong	1
An Ensemble Model with Grey Clustering for Hog Price Prediction Liwen Ling, Chaomin Cai, Dabin Zhang	14
A Novel Grey Target Decision Method Based on a Cobweb Area Model for Standard Interval Grey Numbers Peng Li, Cuiping Wei	29
Multi-attribute Decision-making Method Based on Cosine Similarity with Three-parameter Interval Grey Number Ye Li, Dongxing Zhang, Bin Liu	45
Grey Incidence Analysis Models for Matrix Data and Matrix Sequences Data Xiaomei Liu, Junjie Yu	59
Matrix Grey Models for Forecasting Interval Number Time Series Xiangyan Zeng, Minyan Wang, Fangli He, Shuli Yan, Yanchao Shi	71
A Fractional Order Opposite-direction Accumulative Grey Prediction Model with Time-power Liang Zeng	90
A Feature Selection Approach based on Grey Relational Analysis for Within-project Software Defect Prediction Zhexi Yao, Tao Zhang, Jinbo Wang, Lingchao Zhu	105

Application of Improved Grey Theory in Brain Computer Interface

Chang Liu, Songyun Xie, Xinzhou Xie, Xu Duan, Ya Meng 117

An Algorithm of Student Learning Effectiveness Analysis and Its Learning Misconception

**Inlin Ho, Shuchuan Shih, Chingpin Tsai ,
Jungchin Liang, Masatake Nagai 127**
