

The Journal of Grey System

Contents

A Novel TODIM Method Based On General Grey Numbers And Grey Incidence Analysis Model Peng Li, Liyong Huo, Ju Liu	1
Using Grey Model To Predict The Governance Indicators In China And India Kaihe Shi, Ming Bai	16
A Generalized Grey Universal Approximation For Poor Data Discrete Nonlinear Systems Tie Wang	29
Scaling Foreign-Service Premium Allowance Based On SWARA And GRA With Grey Numbers Moses Olabhele Esangbedo, Sijun Bai	38
Credibility Evaluation For Small Sample Data Based On Grey System Theory And Cloud Model Jianmin Wang, Jinbo Wang	59
A Forecasting Framework Based On GM(1,1) Model And Long Short-Term Memory Network Le Li, Gongyu Hou, Xiaoge Quan, Yajie Yang, Xiaoyun Ma, Wei Liu	78
Fractional Order Accumulation Polynomial Time-Varying Parameters Discrete Grey Prediction Model And Its Application Pumei Gao, Jun Zhan	90

On Spectral Analysis And New Research Directions In Grey System Theory

Sifeng Liu, Changhai Lin, Liangyan Tao, Saad Ahmed Javed, Zhigeng Fang, Yingjie Yang 108

A Novel Grey Model With A Three-Parameter Background Value And Its Application In Forecasting Average Annual Water Consumption Per Capita In Urban Areas Along The Yangtze River Basin

Shuliang Li, Bo Zeng, Xin Ma, Dehai Zhang 118

Prediction Of Direct Economic Loss Caused By Marine Disasters Based On The Improved GM(1,1) Model

Yun Cao, Kedong Yin, Xuemei Li 133
