

An international journal covering the management of weeds, pests and diseases through chemistry, biology and biotechnology

OUTLOOKS ON PEST MANAGEMENT

CONTENTS – JUNE 2006

- 98 **Editorial – Why is there no market in pesticide hazard?** – Gareth Edwards-Jones
- 99 **Trends and opportunities in formulation technology** – Alan Knowles, FORM-AK Formulation Consultancy Services, UK describes developments in formulation technology towards safer and more efficient products
- 103 **American Chemical Society National Meeting, Spring 2006** – Nancy Ragsdale, working with program organizers, has put together highlights from the sessions of the Division of Agrochemicals.
- 105 **Grasshopper and locust control with poisoned baits: a renaissance of the old strategy?** – Alexandre V. Latchininsky and Kirk A. VanDyke, University of Wyoming, Laramie, WY, USA explain the environmental advantages of poisoned baits for grasshopper and locust control
- 112 **Biotechnology news** – developments in molecular biology and genomics
- 115 **Society of Toxicology 45th Annual Meeting, San Diego, March 5-9, 2006** – Derek Gammon of the California EPA summarises key presentations at the 2005 SOT Conference
- 119 **Fungicide Resistance Action Committee (FRAC)** – P E Russell, Secretary of FRAC tells of the work undertaken by the International Steering Committee, the way forward and the success that has been achieved
- 122 **Regulatory news** – new registrations, environmental effects and withdrawals
- 126 **Aphid resistance to insecticides in grain crops in eastern Australia** – Owain Edwards and Louise Lawrence, CSIRO explain that insecticide resistance is common in green peach aphids in grain crops, but it may not be the insecticides used by grain growers that are causing the problem
- 128 **Communications to the Editor**
- 130 **Odour perception, pesticide exposure and ill health** – Following on from the debate on the real and perceived adverse effects of inadvertent pesticide exposure, David Ray describes how an individual's interpretation of exposure and risk can be affected by malodorous interactions following spray applications
- 133 **Company news** – reports on mergers, acquisitions, collaborations and sales
- 135 **The Sunn Pest – a grain of hope for its control?** – Dave Moore and Steve Edgington tell of the losses caused to wheat by the Sunn Pest complex and progress made with mycoinsecticides based on *Beauveria bassiana*
- 138 **Applied organic research – a view from Aberdeen, Scotland** – Jamie Robertson of the School of Biological Science, University of Aberdeen, AB describes the work that has been undertaken by the University of Aberdeen to demonstrate how organic farming can be adopted without serious loss of yield, but with associated environmental benefits
- 142 **R&D news** – reports on new products, new applications and new uses
- 144 **Calendar of Events**

Send details of meetings to the Editor at the address shown on the inside cover
