

An international journal covering the management of weeds, pests and diseases through chemistry, biology and biotechnology

# OUTLOOKS ON PEST MANAGEMENT

## CONTENTS – FEBRUARY 2009

- 2 **Editorial** – *How easy it is to get the science wrong?* – Leonard G Copping
- 4 **The potential for organic agriculture to feed the world is being oversold** – *Leonard Gianessi* checks the facts and finds some questionable claims
- 6 **European MEP majority supports pesticide legislation: industry looks forward to more science and less fiction during implementation** – *Leonard G. Copping* summarises the decision of the European Parliament on pesticide legislation and summarises reactions
- 8 **Company news** – *reports on mergers, acquisitions, collaborations and sales*
- 11 **Detection of airborne plant pathogens; halting epidemics before they start** – *Jon S West, Simon D Atkins and Bruce D L Fitt* describe how early warning of disease risk by sampling the air and using new diagnostic methods to identify the pathogen inoculum can greatly improve strategies for control of epidemics
- 15 **Are sorption and degradation processes adequately accounted for in surface water risk assessments for plant protection products?** – *Robin Oliver, Laurence Hand and Derek Wallace* evaluate the key processes influencing the fate of plant protection products in surface water and the suitability of current approaches to risk assessment
- 19 **Regulatory news** – *New registrations, environmental effects and withdrawal.*
- 22 **Biofuels: What impact on crop protection and seeds now? Part 3: Innovation in crop production, protection and utilisation** – *Alan Baylis* reports on the involvement of crop protection and seeds companies, their current areas of research, and reviews the challenges and potential opportunities for the industry
- 27 **New HPPD-Inhibitors – An “old” mode of action as a new hope to solve current weed problems** – *Andreas van Almsick* discusses the development of herbicides with the HPPD mode of action from their beginnings in Japanese rice fields to the newest generation of this “old” class which is still a “new” problem solver in different crops
- 31 **R&D news** – *reports on new products, new applications and new uses*
- 33 **Australian grain growers: facing the challenges of pest change and control** – *Louise Lawrence* presents an overview of invertebrate pests of Australian grain crops
- 37 **Influence of the green revolution on the insect pests of rice: with particular reference to Bangladesh** – *Zahirul Islam, David Catling, Mohibul Hasan, Sheikh Shamiul Haque, Mahfuj Ara Begum and Mainul Haq* describe the changes in the insect pests of rice brought about by the green revolution
- 44 **Biotechnology news** – *developments in molecular biology and genomics*
- 47 **Book review** – *WHO urban pests book launched*
- 48 **Calendar of events**
