

An international journal covering the management of weeds, pests and diseases through chemistry, biology and biotechnology

OUTLOOKS ON PEST MANAGEMENT

CONTENTS – AUGUST 2009

- 146 **Editorial** – *Regulating the consumer and environmental safety of pesticides* – Terry Clark
- 148 **US preparations for potential introduction of Ug99 strains of Wheat Stem Rust** – Kent Smith, Martin Draper, Kay Simmons, Rick Bennett, Prakash Hebbar, Matthew Royer and Tim Murray describe current efforts in the United States to prepare for the Ug99 strain and its variants of stem rust of wheat and barley
- 153 **Crop protection and the Kenyan flower industry** – Henry Wainwright and Louise Labuschagne outline aspects of the Kenyan flower industry and its associated crop protection strategies and consider the reasons for the success of floriculture in Kenya
- 158 **Regulatory news** – *New registrations, environmental effects and withdrawal.*
- 161 **Bluetongue virus and Culicoides in the UK: The impact of research on policy** – Simon Carpenter, Anthony Wilson and Philip Mellor outline the emergence of the livestock pathogen bluetongue virus in the UK and consider the contribution that basic entomological research has made to policy decisions during the outbreak.
- 165 **Global trends in pesticide formulation technology: the development of safer formulations in China** – Alan Knowles gives an update on how pesticide formulation technology is moving forward in China towards user-friendly and non-target safe products
- 171 **Biotechnology news** – *developments in molecular biology and genomics*
- 174 **Vector-borne diseases in Europe** – Leonard G. Copping reports on a recent SCI meeting
- 176 **An enzyme to protect waterways from the herbicide, atrazine** – Louise Lawrence and Colin Scott describe the discovery and efficacy of an atrazine degrading enzyme
- 178 **Protecting germinating grain crops in southern Australia** – Louise Lawrence describes the pests of germinating grain crops in southern Australia; their biology and management options
- 182 **R&D news** – *reports on new products, new applications and new uses*
- 185 **DEFRA wins appeal against the judicial review by Mr Justice Collins** – Graham Matthews reports on the judicial review of the case against DEFRA regarding pesticide bystander effects
- 186 **Endocrine disruption demystified** – Erik R. Janus explains what endocrine disruptors are and considers the EPA approach to testing for them
- 188 **Reducing human health risk by improving quality of pesticide spray equipment** – Graham Matthews calls for better monitoring of spraying for vector control
- 190 **Company news** – *reports on mergers, acquisitions, collaborations and sales*
