

An international journal covering the management of weeds, pests and diseases through chemistry, biology and biotechnology

OUTLOOKS ON PEST MANAGEMENT

CONTENTS – February 2013

- 2 **Editorial** – *Sharing the Beauty of Scientific Advance* – Leonard G. Copping, Editorial Board Member
- 4 **Pesticide Emissions from Soil – Fate and Predictability** – Daniel J. Ashworth, Lifang Luo & Scott R. Yates discuss pesticide emissions and their impact on human health and the environment
- 8 **Regulatory News** – *new registrations, environmental effects and withdrawals*
- 11 **Bed Bugs in the UK – Before the Upsurge** – Clive Boase considers the reasons for the recent upsurge in bed bug populations
- 16 **Natural Born Insect Killers: Spider-venom Peptides and Their Potential for Managing Arthropod Pests** – Maria Ikonomopoulou & Glenn King examine the potential of insecticidal peptides from spider venom for control of arthropod pests
- 20 **Biotechnology News** – *developments in molecular biology and genomics*
- 24 **Assessment of Risk of Pesticide Use Under the Federal Insecticide Fungicide and Rodenticide Act and the Endangered Species Act; How Much Conservatism is Too Much?** – M. F. Leggett appraises current legislation in the USA on the risks associated with pesticide use
- 28 **Pest Management on US Commercial Mushroom Farms** – Dr John Pecchia & Dr David Beyer outlines the many problems associated with commercial mushroom cultivation in the USA
- 30 **R&D News** – *reports on new products, new applications and new uses*
- 32 **Oak Processionary Moth in the United Kingdom** – Mark Townsend outlines the problems caused by the alien insect *Thaumetopoea processionea* in the UK
- 39 **Fighting the Fear of Pesticides** – Victor M. Shorrock takes a strong position on the poor reputation that pesticides have today
- 45 **Company News** – *reports on mergers, acquisitions, collaborations and sales*

COVER PHOTOS: Cotton bollworm (*Helicoverpa zea*) (Photo by Scott Bauer) and *Aedes (Ochlerotatus) sp.* mosquito on human skin both reproduced courtesy of USDA-ARS; Cocoa showing both frosty pod rot (*Moniliophthora roreri*) and witches' broom (*M. pernicioso*) on the same branch (Ecuador) (Photo by Roy Batemen); Unsprayed strip in sugarbeet showing poppies (*Papaver spp.*) (Photo by Alan Dewar)
