

PRESS RELEASE

London, 25th February 2010

**Impact of Anti-DDT Campaigns on Malaria
by Donald R. Roberts, Uniformed Services University of the Health Sciences, USA**

The latest issue of "Outlooks on Pest Management" describes the successful history of the use of DDT for the eradication of malaria and how single-issue anti-DDT campaigners have compromised the success of this programme.

Also in the February 2010 issue are the following articles:

**The Biological Control of *Fallopia japonica* in Great Britain: Review and Current Status
by Djami Djeddour, CABI Europe-UK**

This describes the problems in the UK associated with the non-native weed Japanese knotweed and the discovery of a psyllid which may lead to its effective biocontrol

**Insect Odorant-binding Proteins: Do they Offer an Alternative Pest Control Strategy?
by Jing-Jiang Zhou, Centre for Sustainable Pest and Disease Management, Rothamsted
Research, UK**

Explains recent advances in our understanding of insect olfactory responses and considers their value as new tools for insect control strategies.

For more information about these articles please contact the Editor, Dr. Len Copping. Email: lcopping@globalnet.co.uk , or call +44 (0) 1799 521369.

To receive a copy of the August 2008 issue, please contact Kumar Patel at kumarpatel@researchinformation.co.uk or call +44 (0)1628 600499.

Outlooks on Pest Management is the leading international review journal of current developments in all aspects of crop protection and, animal and public health worldwide.
